FIDA Nigeria participated in the FIDA World Cup Jeonju 2025, a global drone soccer event held in Jeonju, South Korea. The event took place from September 25 to 28, 2025, at Jeonju World Cup Stadium, featuring over 2,500 athletes from 32 countries

NASENI EVC Mr. Khalil Suliman Halilu Endorses Drone Soccer

FIDA Nigeria received a significant boost as NASENI EVC officially endorsed our drone soccer initiatives, recognizing the sport's potential to promote innovation, STEM education, and youth development. This endorsement reflects growing confidence in FIDA Nigeria's mission to advance drone sports nationwide and nurture the next generation of tech-savvy athletes.

Inaugural Training Program For LSSC

The Lagos State Sports Commission, in collaboration with FIDA Nigeria Drone Soccer Nigeria, hosted its inaugural Drone Soccer Training Program, a groundbreaking initiative that merges sports and STEM education. The event marked a major milestone in introducing drone technology as a new frontier in sporting innovation within the state. Participants were introduced to the principles of flight dynamics, drone control systems, and teamwork through hands-on sessions that emphasized practical STEM learning. The training featured arena setup demonstrations, drone assembly exercises, and flight training to enhance technical understanding among participants. By integrating drone soccer into its development programs, the Lagos State Sports Commission reinforces its commitment to promoting youth empowerment, technological literacy, and the advancement of modern sports education in Nigeria.

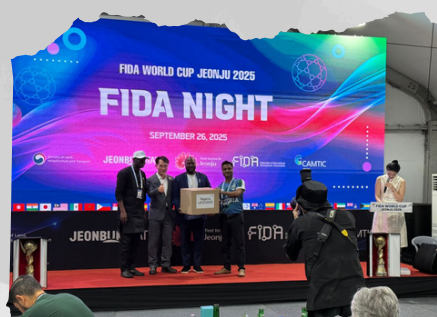

Drone Soccer World Championship South Korea

FIDA Nigeria participated in the FIDA World Cup Jeonju 2025, a global drone soccer event held in Jeonju, South Korea. The event took place from September 25 to 28, 2025, at the Jeonju International Drone Sports Center and Jeonju World Cup Stadium, featuring over 2,500 athletes from 32 countries. The FIDA World Cup is a significant event that combines drone soccer with the rich culture and tourism of Jeonju, South Korea. The tournament features matches in Class 40 and Class 20 divisions, with national and club teams competing.

STEM Initiatives And Education

FIDA Nigeria Drone Soccer represents a groundbreaking fusion of sports and STEM education, promoting practical learning through drone technology. The initiative engages students in core STEM concepts such as aerodynamics, electronics, programming, and teamwork, transforming play into purposeful innovation. Through interactive training and exhibitions, FIDA Nigeria continues to bridge technology, sports, and education through impactful STEM initiatives. Highlights include an exciting exhibition of drone soccer at the Landmark Event Center, engaging students and attendees in the thrill of the sport.

Our outreach extended to Solomon Grace Secondary School, where students participated in hands-on demonstrations, and to the FIDA Nigeria Drone Soccer Assembly Lab, where young innovators assembled drones themselves, gaining practical experience in STEM and drone technology.

These initiatives showcase FIDA Nigeria's commitment to nurturing creativity, fostering technical skills, and inspiring the next generation of innovators through drone soccer.

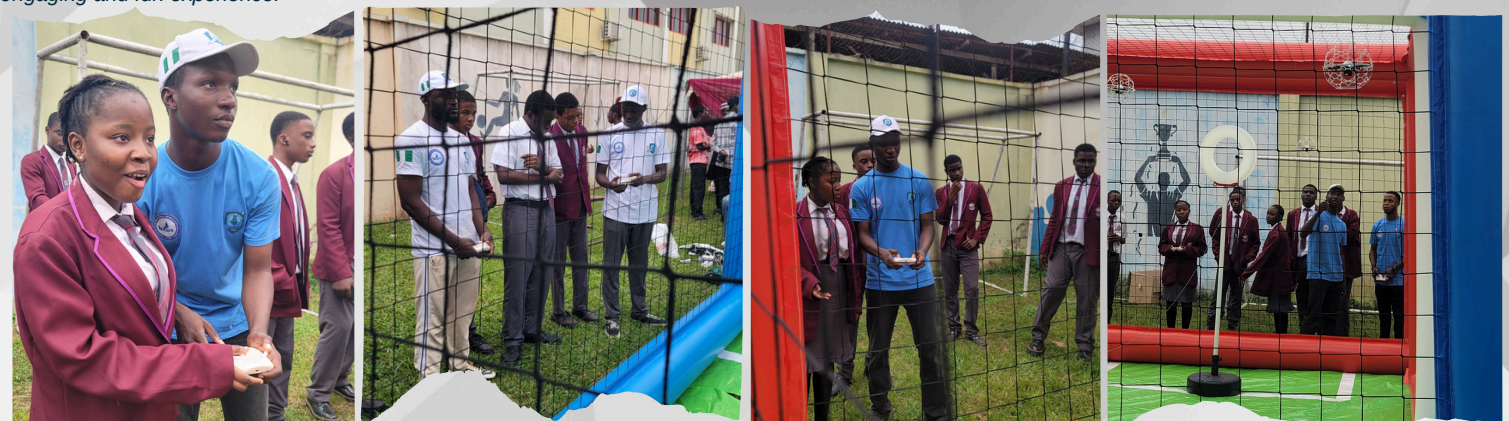

Hands-On STEM Learning At FIDA Nigeria R&D Facility

Drone Soccer Exhibition At Landmark Event Center

The Drone Soccer Exhibition at the Landmark Centre provided a dynamic platform for participants to explore the principles of STEM through hands-on interaction. The event combined learning and recreation, allowing students to understand drone technology, teamwork, and aerodynamics while enjoying an engaging and fun experience.

Drone Soccer Exhibition At Solomon Grace Secondary School

The Drone Soccer STEM Outreach at Solomon Grace Secondary School introduced students to the fundamentals of drone technology and aerodynamics through interactive learning. The session promoted STEM education in a fun and engaging way, allowing participants to combine curiosity with teamwork and hands-on experience in drone assembly and flight control.
